

This shouldn't  
be in your  
river...

You can help  
stop it in its  
tracks when  
you become a  
**River Runner**

Since 2009, the New Hampshire Rivers Council River Runners have been the early detection network for Didymo, Eurasian Milfoil, and other invasive species in our rivers and streams. Training is fun and free and monitoring is easy—just be observant when paddling, swimming, and fishing in your favorite rivers and then report what you find. You'll meet new friends and learn valuable identification skills.

*This training is made possible by a grant from the NH Department of Environmental Services Exotic Species Prevention Grant Program and generous gifts from New Hampshire Rivers Council members like you.*

Be a River Runner!  
Register today for *fun* and *free*  
workshops at a partner  
location near you.

**NEW HAMPSHIRE
